

Make a Pinwheel

You need : A square glazed paper (10cms x 10cms), a drawing pin, a pencil, a ruler, a drinking straw or a stick and a rounded scissors.

1. Draw diagonal lines on the white side.

2. Cut along the diagonal lines.

3. Turn the left corner and glue to the centre. Do this with all the 4 sections. Fix the wheel with a drawing pin in the centre onto one end of the straw. Blow on it or hold it against the breeze to make it spin.
